

Quality, service, and customer satisfaction is our driving force.

AFRIQ DRAGLINE CLEANER

DESCRIPTION

Dragline Cleaner is a homogenous degreaser made up of a blend of selected solvents and emulsifiers. The product is water rinsible formulated to remove the most stubborn dirt, soiled grease and contaminated heavy oils from equipment, machinery and engines. It is specially recommended for heavy duty degreasing, such as draglines, winches, etc. Found in the mining industry. In addition, the degreaser can be used in fire and explosion risk areas due to its high flash point. Dragline cleaner is not recommended for use in electrical equipment, delicate machine parts or rolling element bearings.

APPLICATION

Dragline Cleaner has a slight odour and is applied neat by dipping, spraying or swabbing, allowed to soak into the grime or agitated and then washed off with water. The length of soaking time depends on the depth to be penetrated. Normal safety requirements such as barrier cream, safety goggles, etc., should be observed if there is prolonged use of the product.

PRODUCTION SPECIFICATION

Density @ 20 °C	1.13
Flash Point	100 °C (COC oc)
Cleaning Efficiency	Positive (SABS 1216)
Emulsion In Oil	Positive (SABS 1216)
Emulsion in Water	Positive (SABS 1216)
